

Calcium Bentonite Clay Tips & Testimonials from Perry A~

It's Perry A~ and I am back. Though we sold the Living Clay business in 2015, I have not retired from educating people to the plethora of uses of Calcium Bentonite Clay and answering their questions (512-773-0335 perrya@perrya.com) in an effort to understand this complicated natural substance. As I promised I will maintain the free clay information website www.BentoniteClayInfo.com. Since retiring from the webinars due to ongoing increasing expenses, I am picking up the slack by sending tips, articles, suggested protocols and new testimonials to share the magic of Bentonite Clay.

For a definitive guide to understanding and using clay I recommend my newest book *Calcium Bentonite Clay Nature's pathway to Healing – Balance, Detox, Stimulate, Alkalize*. You can order from www.TheClayBook.com or [Amazon](http://Amazon.com).

Today's Tips & Testimonials is about a 3 year old with Autism

I started using liquid clay for my 3 year old daughter with Autism. Two weeks before I started, my daughter was totally a different person. But today she is very good. I feel that she is able to understand lot of things. She looks at my face, smiling, hugging, she is sitting and playing etc. I am so happy with the results. I am also giving her homeopathy treatment (Cease therapy). We were on and off. But nothing steady progress like this. I was so happy. First time she sat with her ABA therapist, my daughter looked at her face and tried to follow her direction.

After giving the oral dose, that particular day she seemed to be so hyper. And I saw some mild detox in her such as diaper rash, body rash, hyper, lot of self giggling, sleep disturbance and not eating anything. It lasted for 4 days. Suddenly everything subsided on its own. Again after giving her clay she is not constipated. In fact she pooped 3 times to my surprise. Usually she is constipated and I used to give her prunes but the clay helped her to poop. Also her poop color changed to brown color. Her usual color is dark green. Thanks a lot for giving me some peace.

An update from Padma:

I gave the 5th dose of liquid clay to Tara on 6th August. Oh gosh, miracle.....lots and lots of changes. My heart says I am in right direction at last.

Today she went to a play center, where a child fell while running. Since no one helped that kid, Tara went and picked her and tried to wipe her eyes. By then her mom also came running I believe. My husband was shocked and told me this. Tara never did this before. Every day I am seeing changes. It's slow but it is working. My mother in law is still worried about the giving clay to my child. But Perry said nothing to worry about. Also I do want to report that clay also

causing detox for Tara. In fact Tara has detoxed now. But what I noticed is, detox is the same like any other treatment but it goes away on its own within 3 days after the clay is ingested. For Tara her first detox symptoms were a rash all over the body, diaper rash and sleep disturbance.

I got a report from Tara's school that something major happened during the vacation...that Tara is totally a different child now. :) All I did was gave her clay before the school started....To be honest it's true that Tara was different two weeks before. I emailed her teacher that Tara was in a worse shape and asked her to be prepared. Then I googled and came up with a living clay and started clay exactly 1 1/2 weeks before the school started. The fun was, of course, that Tara transformed from worst to super good. I am typing this email with tears in my eyes. – Padma G.
